DETAILED ACTION

Response to Amendment

1. This office action is responsive to the amendment filed on November 24, 2009. As directed by the amendment: claims 1, 4, 10, 13, 17, and 20 have been amended, claims 2, 11, 16, and 21 have been cancelled, and new claim 22 has been added. Thus, claims 1, 3-10, 12-15, 17-20, and 22 are presently pending in this application.

Terminal Disclaimer

2. The terminal disclaimer filed on December 7, 2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application numbers 10/605,187 (US 7637891) and 10/597,997 has been reviewed and is accepted. The terminal disclaimer has been recorded.

112, 6th Acknowledgements

3. With regard to Applicant's "means for retaining a reservoir containing an injectable liquid composition" and "means for providing liquid communication between the retained reservoir and the injection needle" of claim 1, the language appears to be an attempt to invoke 35 USC 112, 6th paragraph interpretation of the claims. A claim limitation will be interpreted to invoke 35 U.S.C. 112, sixth paragraph, if it meets the following 3-prong analysis:

- (A) the claim limitations must use the phrase "means for" or "step for;"
 - (B) the "means for" or "step for" must be modified by functional language;
- and

(C) the phrase “means for” or “step for” must not be modified by sufficient structure, material or acts for achieving the specified function.

In the instant case, applicant appears to have met the limitations set forth in MPEP § 2181, and examiner has turned to the specification for clarification.

In the specification, applicant defines the “means for retaining...” as a threaded engagement (see par. 0016, 0104, 0109) and the “means for providing liquid communication...” as a penetrable membrane and an inlet end of an injection needle for penetrating the membrane (see par. 0016). Accordingly, the examiner is interpreting the “means for retaining...” and “means for providing liquid communication...” to encompass these structures and their equivalents. Equivalent structures may include those that perform the function specified in the claim, structures that are not excluded by any specific definition provided in the specification for an equivalent, or is a structural equivalent of the corresponding element disclosed in the specification. See MPEP 2183.

4. With regard to Applicant's "means for liquid communication between the reservoir and the injection needle" of claim 10, the language appears to be an attempt to invoke 35 USC 112, 6th paragraph interpretation of the claims. A claim limitation will be interpreted to invoke 35 U.S.C. 112, sixth paragraph, if it meets the following 3-prong analysis:

- (A) the claim limitations must use the phrase “means for” or “step for;”
- (B) the “means for” or “step for” must be modified by functional language;
- and

(C) the phrase “means for” or “step for” must not be modified by sufficient structure, material or acts for achieving the specified function.

In the instant case, applicant appears to have met the limitations set forth in MPEP § 2181, and examiner has turned to the specification for clarification.

In the specification, Applicant defines the “means for liquid communication...” as a penetrable membrane and an inlet end of an injection needle for penetrating the membrane (see par. 0016). Accordingly, the examiner is interpreting the “means for liquid communication...” to encompass this structure and its equivalents. Equivalent structures may include those that perform the function specified in the claim, structures that are not excluded by any specific definition provided in the specification for an equivalent, or is a structural equivalent of the corresponding element disclosed in the specification. See MPEP 2183.

Reasons for Allowance

5. Claims 1, 3-10, 12-15, 17-20, and 22 are allowed over the prior art of record.
6. The following is an examiner’s statement of reasons for allowance: the claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device.
7. The closest prior art of record is Miskinyar (US 5527287).
8. Regarding claims 1 and 10, Miskinyar fails to teach among all the limitations or render obvious an injection device that is intended for a painless intramuscular injection that has a housing, a needle with a specific diameter to help with flow rate and reduced trauma, a means for retaining a reservoir, a means for liquid communication, and a

Art Unit: 3763

manually powered spring that exerts pressure upon the injectable liquid composition within the retained reservoir to inject the injectable liquid at a substantially constant volumetric flow rate of about 0.5 $\mu\text{L/s}$ to about 20 $\mu\text{L/s}$. The flow rate helps provide a painless injection because of the rate in which the medicament is injected into the patient and at the constant volume during injection.

9. The Examiner has also invoked 35 U.S.C. 112, 6th paragraph for the “means for” language present in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
